- THE MINITAL OF THE RY LARS

Most men regard the missives as entirely on a patent to but a row, if they will one, or to sel wtest, potatoes, wool or pirk, if they have effect to see and they do not expect or call for a law to fix the price of either commodity in set der that they may not be cheated in buying or Now with it is in men may be trusted to make their over countries in these matters, that they may not be trusted, or may not trust themselves, on the their own contracts is themselves, on the their own contracts is the use of more Since they make their own contracts as to rent of lands and buildings, with in it terference of the law, why may thet not make their own contracts, without inte ference of the law for the pane of money or payment of

A usury law is based on the theory or supp stron that men are incompetent to make then own con rac's and lo their own business. Hence the law must be invoked to prevent them from mouring themselves by agreeing to pay too a nuch rental for money. This is the notion on which usure laws are based. It is insound, antiquated, exploded. It is as if it should be declared by law that the farmer should not sell his wheat or wool above a fixed price, or that a fandlord should receive for his lands or buildngs no more than a fixed and hunted renta.

That is, the regulation is futile and abourd, t cannot make money cheaper or easier to ge, but it may and does obstruct financial transacsent to violate the law and risk the penalty, and therefore they will not risk their money at al Others, who do lend, beat the neary law by a direct though entirely effective methods, for which the horrower, however, is compelled aways to pay, in one way or another A usury law is intended to help or protect

those who need money badly, that is to say, those whose credit is more or less doubtfu. While the man whose credit is good can get n oney at a low rate of interest and needs no usury law to protect him, the man whose credit is not good can get it only with difficulty or can't get it at all and therefore a usury law can't help bim, but only makes matters worse. It says to the lender that he shall not land at ate say above 10 per cent, but the credit of the borrower is not good enough to justify the rist at that rate, and so he will not lend at all using law, therefore, belos no mut to get money at a cheap rate. But it does prevent many from getting money at rates which the would gladly undertake to pay, and it forces upon n any others the expense of getting money whom n any others the expense of getting money by circuitous and costly inethods Were the usury law repealed the mortgage

tax law could stand and wood the in nobedely way. Persons who want money could make their own contracts with those who lend money without rehance on a law which is only a hind rance and never can save borrowers from appression. Does not every man who stops to think thant it regard himself quite as compa-tent to decide what he shall pay for the use o money as for the use of a house or the use of flock of sheep? Resides, will be not see, on re flection, that in these and all other hummers affairs, the law, while it may obstruct his trans actions, cannot possibly protect him If the legislature will consent to repeal the

usery law the prestion of taxing martgages, and ther credits will take cure of a elf

THE PROPOSED CHAPLES It is no more "Contrary to the spirit of our

institutions to have a charter under which ce institute is to have renaries in a swinch certain afterns of the city will be appointed by a minist need as the courtest proposed, then to have a chotter mader which such officials or as pointed by the mayor and countil, as now. The ment of the new plan consists in the division of duty, authority and I wer. At present every thing is in the ban is of the major and council melading appointment to office, the levying of taxes and an defit sof administration. A barro of appointment would relieve the major may council of part of these duties, so that appointmen a un i employments could rest on a separate and tdepen int lass of a thority and respon-sion. It may be seen at a glance what the advintages of this plan are. The distribution of duties which it provides would prevent com-binations in which all the affairs of the city are pooled 11 great jobs for ends altogether unworthy, and more or less corrupt. I ader the new plan in pointments to office would rest on fitness and would ut be the result of har gin and trans out owholl everything was thrown getter the major and nembers of the council would no longer be elected | I it 1 e members of a rung of combination are official places the separation and distribution of duties would present the other officials if the city from having the influence over the major and council which they now person the commissioners would have one line of data o follow and the mayor and concel another, and each lody would hant and the k the other at proper fourts and in a satutars was. SENATOR SHERMAN AND THE TREATY

It is to its regretted that Senator Shorman has ient if e infinence of his name to the opposition to the Nic. ragin; treaty, on the ground that such treaty would be a volution of the Clayton-Bul-wer convention which he holds a still in force Most Americans who have examined the subject innet regard this as a mistake. To those who nest regard this as a mistate. To those who hold that the new treaty is in conflict with the Cayton-Bilwer agreement of 1800, it should only be necessary it say that the terms of that corrention were nested as by other garriment, that it is project fell still form, and that the treaty has been regarded as a dend-letter for more than a quarter of a cetture. This would be a sufficient quawer to the objection, but a more than the treaty has been represented by the confliction. more conclusive one is found in the fact that President Garield, through Mr Brune and President Arthur, through Mr Srelinghuvshu, have formally motified Great Britain that the United States no longer deems it to her mer est to non with dur fiveign nation in guaranteeing neutrality in the use of no American in

er-oceanic water way
There are those who fear if at England may kick against the Nicaragus treaty and attempt to enforce the agreement of 1850, but what of that? When Mr Evarts was secretary of state he laid down the doct me that "the policy of this country is a carul uncer American con-trol." There should so no offense in this to any other nation. Americans generally regim-the. Clayton Bullwer fronts as void, because tts signilations referred to a project that was never carried out, and because beginned long since violates its letter and spirit. True, its provisions applied to any other "practicable means of communication," but the Panama railway has been in oper-ation for thirty years without any guarantee by Great Britain. As to the "new ceparture" in foreign publics, the treaty is not so much an m novation as the giving spractical effect to a doctrine which has long been held in his country, and which has become essential to our national

The English press keeps up its nre against the Nicaranguan treat, unable to see why the United States should have such inter-oceana-water-way of its own through the American isthmus as Great Britain has through the African isthmus, the thing that seems is trouble the Englis: press is the thought that the Nicaragua canal may be the only one. If at the De Lesseps projec may give way before its gigantic rival, since no private corporation could compete in financial resources against the Washington treasury and, with only one said, and that in the entire control of the tinted Sla es, it would he a serious menace to the commercial interests of Great Britain. But this English view of the subject need not worry the United States Pursuant to what the wisest statesmen have long egarded as heldemands of self-interest, the United States proposes to build an I control this inter-oceanic canal, with the entire consentant control assistance of the friendly retublic through whose territory it must pr This important stel is taken, too, as a lart of the An erican piles that the lands States, and not Great Britain, or any other foreign power, shall bave a controlling voice in deciding times tions affecting the par mount interests of the tions affecting the par mount interests.

THE DEADLESTA. AT SACHAMENTO.

SAN FRANCISCO, Juny 11.—The dendlock in the senate at Sacraments continues. A residuation, tellered locking that the candidate for president for them receiving the smallest mander of voles, after three ineffectival hallots, be dropped, and the one receiving the highest mander to voles, after three ineffectival hallots, be dropped, and the one receiving the highest mander to declared elected, was defeated. The republicars can break the deadner of the democratile facilities, and bring the coalcock to a close, and thus effect organization of the senate. The continued fight for organization of the senate. The continued fight for organization has given tailous senatoria, cand dates an opportunity to test their relative steenisth. The presult is massisfactory to all. Many though to-night inflicte that the standership will be ultimately tendered Governor Stanford.

SAN FRANCISCO, Jan. 14.—It is stated here to-night that an understanding has been reached between the republications and democratic streight onts, and that Secular Dennis Spencer will offer a resolution te-motrow in the senate at Sacramento that a righe be adopted order the two-flittle rolling, that the sandidate for president protein. receiving the lowest number of votes be foruped, and that under the right the voting les proceeded with until their remains but two candidates, the ore of these two who receives the highest number of votes to considered as elected precident protein. If this plan is allouised, and no understanding as to choice having been previously reached, between republicans sind democratic straight-outs, the result will be select Whitney. This will put the organization of the senate in the bands of the republican organization of the senate in the bounds of the republican organization between republicans sind problems to be not before the senate, and too important to justify furf er deds.
